## Our Inuit Adventure

When we ran down the hill, we saw the igloos built by the Inuit. They had lots of fish caught in the ocean. We made some roast fish for lunch. I bought some blankets and brought them inside the igloo. The water froze during the night, but we kept warm as we slept inside the ice house. In the morning, I swept out some snow from the entrance. Once outside, I thought about all I had been taught about the Inuit culture. It was a great day.
